A NEW WEEK AT NVS

PHYSICS

G12 students became "young teachers," explained electric field strength to classmates. They showed how an electric field describes the force experienced per unit positive charge. Teaching and learning together made physics engaging for everyone!

CHEMISTRY

Abdulla Khalil (12C) took on the It's Time to Climb! challenge, climbing step by step through scientific questions and challenges to strengthen his understanding of Entropy Changes. With every step, he explored how energy is distributed and how disorder changes during different processes.

ARABIC

Outdoor Collaborative Reading & Research Session

Grade 12 students participated in an engaging outdoor reading session focused on classical Arabic literature, including Hayat Al-Hayawan by Kamal al-Din al-Damiri. Through group discussions, guided reading, and collaborative analysis, students explored classical texts, strengthened their critical thinking skills, and deepened their understanding of historical Arabic prose. The outdoor setting encouraged active participation, peer learning, and meaningful literary discussions.

UPCOMING DATES, EVENTS & ACHIEVEMENTS

The month of October is all about PINK. It is a time to raise awareness about breast cancer, show our support, and remind those affected that they are not alone.

There are many ways we can show our support. You can wear pink, donate to breast cancer organizations, or wear a pink ribbon as a symbol of hope and solidarity. Even a small gesture can help spread awareness and remind breast cancer patients and survivors that their community stands beside them.

This October, let's come together, wear pink, raise awareness, and show our support. To every person affected by breast cancer: you are not alone. We stand with you.
